

How do I change my paint cost?

Go to 'Company Information' on the main start screen.

The screenshot displays the PMCLogic software interface. At the top, the logo "PMCLogic" is shown in white on a green background, with the text "PAINT AND MATERIALS MANAGEMENT SYSTEM" below it. A blue bar below the logo contains the text "Support 800.288.6564". On the left side, there is a green button labeled "Edit / Print Invoice". In the center, there is a 3D model of a car with various parts highlighted in blue. A red arrow points from the car model to the "Company Information" button. On the right side, there is a vertical list of blue buttons: "Estimates", "Repair Orders", "Reports", "Product Maintenance", "Company Information", and "Preferences & Settings". The "Company Information" button is highlighted in green.

Then click on the 'Paint' tab.

The screenshot shows a software window titled "PMCLogic" with a close button in the top right corner. The main heading is "Update company information" with a subtitle "Describe your company by entering the information below." Below the heading are several tabs: "General", "Tax", "Paint", "Invoice", "Materials", and "Substitutions". The "Paint" tab is selected and circled in red. The "Paint" section contains three sub-sections: "Paint", "Clearcoat", and "Sealer". Each sub-section has a checked "Use as default" checkbox, a "Manufacturer" dropdown menu (all set to "Sherwin-Williams"), a "Type" dropdown menu (all set to "Solvent-based"), and three percentage input fields: "Price Adjust %", "Cost Adjust %", and "Coverage Adj %". The values for these fields are 120, 85, and 100 respectively. Below these sections is a "Custom Paint Brands" section with an empty list box and "Add", "Edit", and "Delete" buttons. At the bottom, there is a "Unit of Measure" dropdown menu set to "OZ - Fluid Ounce" and "OK" and "Cancel" buttons.

Section	Use as default	Manufacturer	Type	Price Adjust %	Cost Adjust %	Coverage Adj %
Paint	<input checked="" type="checkbox"/>	Sherwin-Williams	Solvent-based	120	85	100
Clearcoat	<input checked="" type="checkbox"/>	Sherwin-Williams	Solvent-based	120	85	100
Sealer	<input checked="" type="checkbox"/>	Sherwin-Williams	Solvent-based	120	85	100

Unit of Measure: OZ - Fluid Ounce

For Paint, Clearcoat, and Sealer you can adjust the cost by changing the 'Cost Adjust %' from 100.

Example: If you get a 15% discount you will type in 85.

The screenshot shows the 'Update company information' dialog box in the PMCLogic software. The 'Paint' tab is selected, and the 'Cost Adjust %' field for each of the three product types (Paint, Clearcoat, and Sealer) is highlighted with a red box, showing a value of 85. The 'Price Adjust %' field for each is set to 120, and the 'Coverage Adj %' field is set to 100. The 'Manufacturer' dropdown menu is set to 'Sherwin-Williams' for all three. The 'Unit of Measure' is set to 'OZ - Fluid Ounce'.

Product Type	Use as default	Manufacturer	Type	Price Adjust %	Cost Adjust %	Coverage Adj %
Paint	<input checked="" type="checkbox"/>	Sherwin-Williams	Solvent-based	120	85	100
Clearcoat	<input checked="" type="checkbox"/>	Sherwin-Williams	Solvent-based	120	85	100
Sealer	<input checked="" type="checkbox"/>	Sherwin-Williams		120	85	100
